

How Much Is Enough?

Lecturer: John Guttag

```
def stdDev(X):  
    mean = sum(X)/float(len(X))  
    tot = 0.0  
    for x in X:  
        tot += (x - mean)**2  
    return (tot/len(X))**0.5
```
